Schools and Colleges have to be viewed as the light houses of society. We must agree that the fundamental changes can come in the society through education only. The quality of education in our college shall determine the quality of our surrounding society tomorrow. Our college provides an atmosphere for spiritual, mental and physical growth of the students. Being the principal of this college I take pride in stating that our college has been successful in providing quality education to students.

As per new education policy - 2020

1st Time in South Bengaluru

4 Years Integrated Program

For Students in class VIII (Going to IX)

- A study program to the JEE/NEET and other competitive entrance exams.
- A study plan that unlocks lot of extra time.
- A program for boards as well as JEE/NEET preparation that will complement each other.
- A program that will enable students to crack not ONLY JEE/NEET but also other competitive exams effectively.

Why Four Year Integrated School Program ?

IITs have imposed limitations on the number of JEE (Advanced) attempts. Students are granted a limited number of opportunities: two, one promptly following the XII board examinations and the other the following year. It is advisable for individuals to strive for success in the JEE examination on their initial endeavour and avoid undue stress, as the risk of experiencing illness or being involved in an accident during their second and final attempts could be too hazardous. Prior to the 1980s, it was acceptable to begin preparations immediately following XI and at the start of XII; however, in order to achieve the highest ranks, one still needed to initiate preparations at the outset of XI. It became customary in the late 1990s to commence JEE preparations at the start of Class XI and invest a minimum of two years in rigorous training. At this time, in light of the intensifying competition and the fact that only two opportunities remain, success in the JEE Main and Advanced examinations can be achieved by exceptionally gifted students who commence their studies in Class XI. However, in the absence of an innate ability that propels one to the top tier of JEE graduates, one is compelled to commence preparations as early as Class IX in order to attain the intended level of JEE achievement.

Why Residential?

- Parents are aware that the students nowadays are addicted to mobile phones, online games, social media related facebook, instagram, and other info automatically diverts the attention of the students towards addiction of undesirable devices and app.
- Some students are travelling from far of distances and are usually facing lots of problems due to traffic jams and crowd.
- In most of the families both parents are working and may not get enough time to concentrate on their wards.
- For all such minor or major issues simple solution is residential accommodation.
